EXPERIENCE

Web Developer Intern

Entrepreneurial Center, Augustana College

December 2022 - May 2023, Rock Island, IL

- Utilized HTML, CSS, JavaScript, and SQL to develop and implement a web application that met clients' needs.
- Developed custom websites for clients, optimizing web search, improving UI, and troubleshooting existing problems in clients' current websites.
- Conducted regular updates to clients' websites by performing usability tests, resulting in increased client satisfaction and improved productivity.

PROJECTS

Reminiscer | React, Sass, Firebase

- Building a captivating photo storage app that allows users to preserve and cherish their precious memories in a visually appealing and engaging way.
- Leveraging React and Sass to create a delightful and user-friendly interface, featuring a nostalgic Polaroid-like photo style and intuitive navigation.
- Empowering users to easily share their cherished moments with friends and loved ones, fostering a sense of connection and nostalgia.
- Project link: <u>GitHub</u> | <u>Live Site</u>

My Fitness | React, Firebase

- Developed a full-stack fitness web application using Firebase for authentication, database, and hosting for the back-end, and React as the front-end.
- Employed industry-standard practices such as version control using Git and project management with Agile methodologies to ensure the timely delivery of the project.
- Provided features such as goal setting, progress tracking, and workout planning, allowing users to easily monitor their journey.
- Project link: GitHub | Live Site

Personal Website | React

- Utilized React and CSS to create an interactive web page structure that successfully displayed relevant professional skills, projects, and portfolio items.
- Project link: Live Site

AWARDS & CERTIFICATE

Al-Khwarizmi Society, Dean's List

Computer Science Department, Augustana College • 2023
